Controller shows Battery Voltage

TV plugged into power strip
and power strip to Inverter

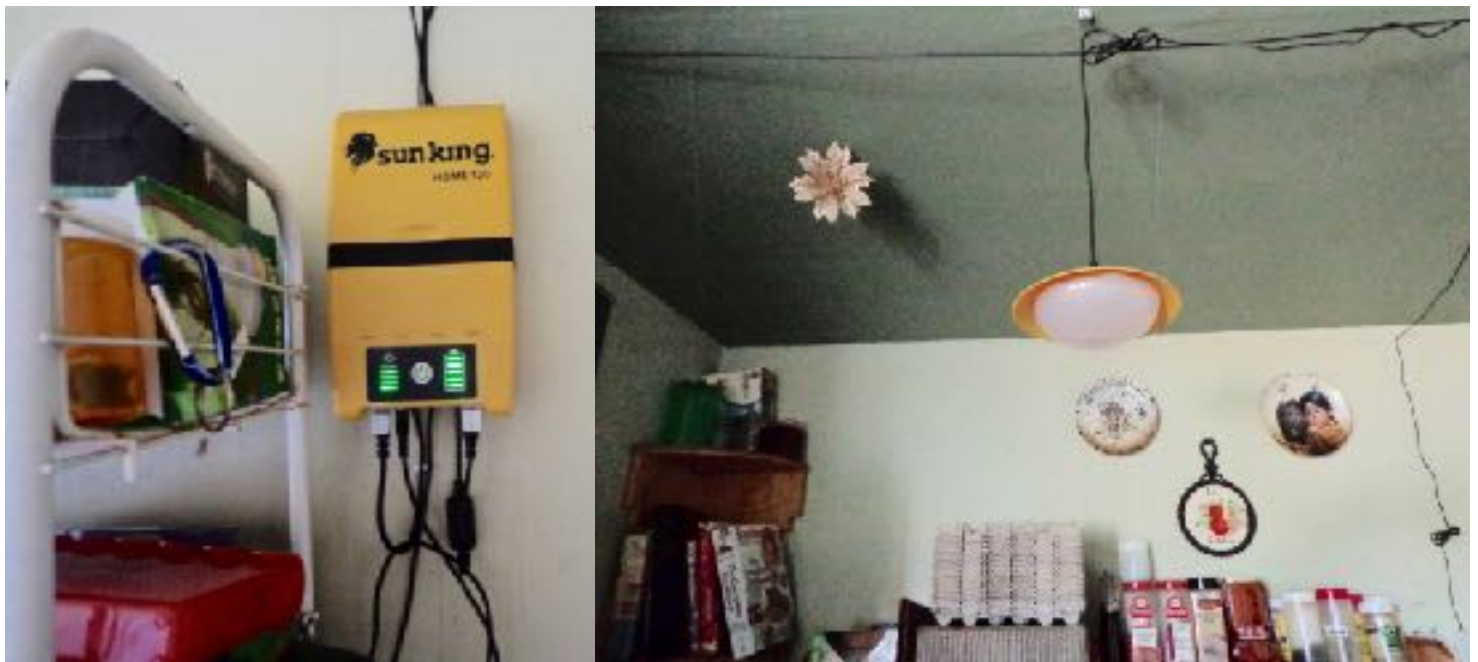

DC Refrigerator

History!

Sun King Home was the first step....

This is the ground mount Freddie built for the 245 watt panel that came with Solar Team 2 system.

Somewhere along the way the Lee's purchased an old set of panels from a defunct NTUA system which they will eventually add on.

No lack of ingenuity here, adjustable solar panels for the Sun King Home and Sun King desk lamp.
