

Solar Team 7 Application, due by June 21, 2023

If you are one of the ten applicants chosen for this program, you will receive a 200 watt solar system that will power lights, charge devices, and run low wattage AC appliances. A small DC refrigerator is included.

QUALIFICATIONS

The system must be installed at an indigenous home without electricity. It can be your home or the home of an indigenous person who can benefit from this very basic system. Preference will be given to those needing refrigeration for meds.

CLASSES

You will receive training to understand, install and maintain the system safely. Completion of the course is required. Missed classes will be scheduled for make-up. The course consists of 5 Classes every other Wednesday at 6pm from July 12 through September 6. Classes are held as part of Gallup Solar's regular hybrid meeting schedule in person at 113 East Logan Ave., Gallup and by Conference call. To call in, you will need to a good cell signal, landline or internet connection. Classes are online at gallupsolar.org, or we can loan you a tablet for home study. You do need to study the material because you will be asked to discuss it.

HANDS-ON SESSION

After Class 5 you will receive hands-on system training with Bill Bright. You may bring the recipient(s) with you if you are donating.

INSTALLATION

You will be paired with an experienced graduate for the installation. If you are not the recipient, you will teach them how everything works and be available for follow up maintenance as needed. It's best if their location is easy for you to get to.

PRESENTATION

A final report with photos must be presented when you have completed the install. We also welcome videos, slideshows or powerpoint.

GRADUATION

A certificate of completion is given by Gallup Solar. You may even decide to become a Solar Tech Installer, get NABCEP certified or even start your own business.

To apply please supply the information requested below:

1. Your name:
2. Age:
3. Email address:
4. Phone number:
5. Tribal affiliation:
6. Languages spoken:
